Thank you Becki.

I've forwarded these to ATSDR as they have expressed interest in taking a lead on the development of an 'advisory' on the glycol ethers.

Many thanks to Bob and Vince for working on this during their weekend!

Chris

Chris,
Please see some initial comments from Vince and remarks from Bob Kavlock. We'll need to do some additional outreach within EPA tomorrow, but I thought you might want to see this sooner.

Becki
Please see comments below from Vince. I had to use my private email to read the attachments, so please excuse the forwarded message below.

I looked at the names and most of the authors are industry toxicologists that Ex. 5 - Deliberative
Ex. 5 - Deliberative I recognize a number of the reviewers as senior industry toxicologists. Nevertheless, Vince raises good points.

The CSA was submitted to EChA under REACH. We could contact them if desired for any additional info. But they usually rely on the dossiers being sufficient for their needs. It would also be good to reach out to OCSPP and get their view. Jeff Morris would be the place to start.

At least this chemical has more tox info. There is a multi-gen and two dev tox studies. From the provided summaries they do not appear particularly active. There is also a rich amount of read

across info. For that reason I would definitely recommend OCSPP consult.

Bob
